ABOUT BAMBOO BELGIUM

It is my biggest dream and mission to make sustainable bamboo clothing the standard in the fashion industry. Therefore, Bamboo Belgium specializes in designing and producing stylish, timeless, and sustainable bamboo clothing at a fair price. The vision is a 100% sustainable lifestyle. Life is about love, respect, and equality for nature. So, for both humans, animals, and the environment...

That's why Bamboo Belgium chooses these three pillars with its clothing:

1. Slow Fashion made from bamboo weed
2. Fair production in Europe
3. Sustainable entrepreneurship

What contribution do you make for a sustainable future when you buy or sell a product? The future of sustainable clothing, sustainable living, and sustainable entrepreneurship is within your reach... One choice can make all the difference for the fashion industry. Join the future and choose slow fashion made from bamboo!

Love, Fina Vanbuel

bambu

***"Made with love,
to sell with love,
to be worn with love"***

Founder Bamboo Belgium Fina

PARTNERSHIPS

“One choice can be all-decisive for the sustainable future in the clothing industry”

“Reduce the CO2, wear Bamboo.”

P.6

To make sustainable clothing the standard, we find it important to collaborate with sustainable partners who share the same sustainable vision and dream and want to make a difference by working WITH the clothing industry.

Only together can we create greater and faster impact. Together we are stronger.

That's why Bamboo Belgium works with sustainable partners who:

- Feel, understand, and appreciate the value of sustainable bamboo clothing.
- Are willing to lovingly explain, promote, and sell the story behind bamboo clothing.
 - Focus on long-term collaborations that contribute to a greener livable world.
 - Are willing to respect and pay fair prices. This means:
- Purchase prices based on living wages and healthy margins for producers and retailers.
 - Adherence to recommended retail prices.

Together, we strive for transparent relationships and a win-win-win situation for humans, animals, and the environment

FROM FAST TO *Show fashion*

MEET ALBERTO & MANUELA FROM OUR IRON AND WRAP TEAM IN PORTUGAL.

P.7

Bamboo Belgium chooses fair and transparent production in Europe and sustainable entrepreneurship in the form of bamboo slow fashion.

- Without seasonal or trend-driven collections.
- Without extremely cheap sale prices and continuous discounts.
- Without promoting consumer behavior and addictions through greenwashing.

We didn't start this to sell clothing for profit maximization because in the fashion industry, we're losing respect for the Earth, people, and animals.

As a consumer, you might think you're getting a good deal for €10, *but what lies behind the production process?*

And what unconscious ecological footprint are you leaving behind? *Do you dare to look at yourself in the mirror?*

In the fashion industry, it's time for change without environmental pollution, climate damage, and worker exploitation.

That's why our forward-thinking, ecological, and sustainable vision is focused on contributing to a conscious and environmentally friendly lifestyle.

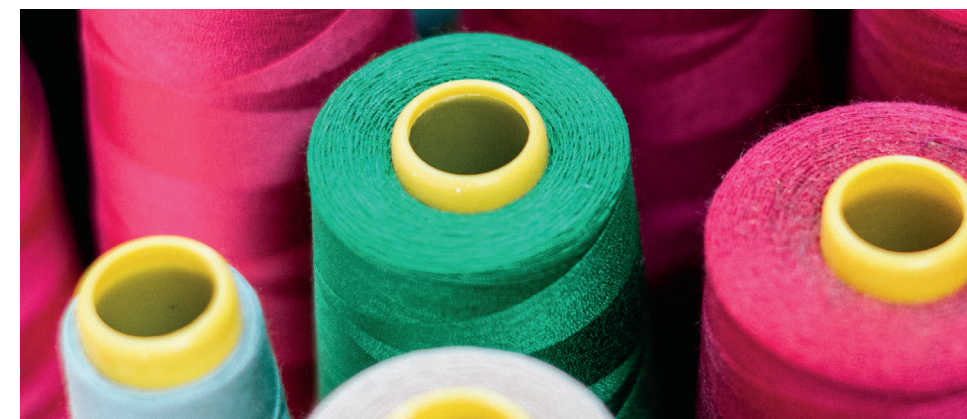

Hence, our slogan:

“Made with love to be worn with love!”

MOODBOARD *bamboo*

P.8

TRANSPARENT PRICES

Therefore, every sustainable partner and link involved in the production and sales process of Bamboo Belgium clothing receives a fair and livable wage.

To give you a transparent overview of all the individuals involved from A to Z in the production and sales process, please refer to the list below.

The collective contribution of all partners determines the product's value and, thus, the fair purchase price.

This should become the standard in the fashion industry because with fast fashion, workers are still underpaid under unsafe and poor working conditions.

Slow fashion, on the other hand, prioritizes love, respect, and equality for humans, animals, and the environment!

"With all these steps, a fair shirt simply cannot cost only 10 euros."

P.9

TRANSPARENT CHAINS

The sustainable partners and links in the production and sales process include:

- The bamboo farmers in the bamboo field • The transporter to the pulp factory
 - The bamboo pulp factory
 - The transporter to the spinner
 - The spinner turns it into yarn
 - The transporter to the weaver
 - The weaver turns it into fabric
 - The transporter to the dyer
- The dye house colors it with organic dye
 - The transporter to the finisher
- The finisher processes the fabric to prevent pilling
 - The transporter to the sewing factory
 - The small sewing factory
 - The pattern maker
 - The cutting department
 - The sewing department
 - The quality control department
 - The ironing department
 - The packaging department
- The shipping and transportation to Northern Europe (via Belgium) or Southern Europe (directly)
- Further transportation in Northern Europe • Overhead costs

"I want to contribute to a sustainable world by providing fair and livable wages."

17 SDG'S

17 GLOBAL SUSTAINABLE
DEVELOPMENT GOALS

At Bamboo Belgium, everything revolves around the 5 values:
Awareness, respect, transparency, equality, and beauty.
Based on the Sustainable Development Goals (SDGs), the focus is on quality
rather than quantity.

*More is not better.
More is not sustainable.
More is not future-oriented.*

By choosing less, we achieve more in the long run.
Together, we create a ripple effect.
So, are you willing to contribute to our big mission?
Together we are strong, and you can easily make a difference.

Join the future!
